

**SECURITY MEASURE DURING**  
**THE DRIVE-HUNT**

- Please always put your safety vest on( you will get it from us) once you leave the assembly point and refer your stand.
- **VERY IMPORTANT:** The stand should not be left for any reason until you are picked up by the professional hunter.
- Please shoot only when you see the animals. When you shoot take care to avoid the rocks and stones to ricochet and rebound of the bullet. The trajectory of the bullet to shoot should be downward.
- Please do not shoot when you see that the bullet goes in a straight line to the ground or against the sky.
- Don't shoot if you are not sure that you are shooting to a wild boar or a barberry-sheep. No silhouette shots!
- During the transport, have not to be any cartridge in the barrel of your gun. Weapons must always be transported completely discharged.
- The rifle must remain always in the case or soft case until you arrive at your stand.
- The stands are situated in a straight line, so **IT IS FORBIDDEN BY LAW TO SHOOT TO YOUR RIGHT OR LEFT POSITION, OR IN THE DIRECTION OF THE REST OF THE HUNTERS.**
- During the hunt a lot of dogs and dog-drivers will be walking all over the hunting-area, so please take care, they can come any time out.
- After the hunt, please check that no cartridge left in the barrel and store your gun back in the sheath.

I have read the security measures,
